

THE MONEY REVOLUTION

How to Ride the Next Big Wealth Wave
with Real Crypto, Real Mining,
and Real Freedom

Mike Healy

Textit Coin: The Money Revolution

INTRODUCTION: YOU MISSED BITCOIN — BUT YOU DON'T HAVE TO MISS THIS

If you're reading this, chances are you've said something like this before:

"I wish I had gotten in early on Bitcoin."

You're not alone. Most people missed it — and they missed Ethereum, Litecoin, Cardano, Doge, and even Shiba.

But what if your second chance is right now?

What if you could own a coin with real infrastructure, real mining, and real people behind it — before it takes off?

That's the story of **Textit Coin**. This isn't just another meme coin or hype project. It's a serious blockchain project with a bold mission:

To build a truly decentralized currency that starts in Texas — and could one day rival Bitcoin in impact.

Textit Coin: The Money Revolution

THE FUTURE OF MONEY ISN'T PAPER

Let's be real — your dollar is worth less every year. Inflation is eating your savings. Bank fees are rising. And the Federal Reserve prints money like it's toilet paper.

Crypto is the evolution of money.

But most of crypto is just speculation. Gamblers. Traders. Bots.

Textit Coin is different. It's a **Layer 1 blockchain** (like Bitcoin and Ethereum), built on the proven Litecoin protocol, with one major twist:

It's **mineable only in Texas**, with no pre-mine, no VC funding, and no central control.

It's grassroots, fair, and community-led.

THE FOUNDER WHO'S BEEN HERE SINCE DAY ONE

Meet **Bobby Gray**. In 2012, he minted the first physical Bitcoin coin — yes, the famous one. He ran a coin minting company called the American Open Currency Standard.

He even testified in front of Congress about parallel currencies.

Bobby's not some kid with a dream. He's a man with a mission — and a track record.

Now, he's building the **largest decentralized mine in the world**, powered by everyday people.

He didn't just talk about crypto — he helped shape its early culture.

And with Textit Coin, he's making sure the **people win this time** — not just whales, banks, or megacorps.

Textit Coin: The Money Revolution

HOW TEXTIT COIN WORKS

- **No pre-mine:** Every token is earned, not gifted to insiders
- **Mineable:** You earn Textit Coin by operating a virtual miner (node license)
- **Decentralized:** No single entity controls the supply
- **Fast and efficient:** Built on Litecoin's proven tech
- **Texas-based:** All mining happens through infrastructure built in Texas

Want to earn daily rewards? Get a node license.

Each license mines Textit Coin automatically. It's **plug-and-earn**, not plug-and-play.

Textit also sends you your very own cold storage wallet to securely store mined tokens.

Textit Coin: The Money Revolution

THE GOLDEN GOOSE STRATEGY

Here's the best analogy:

- **The node** = The golden goose
- **The Textit Coin it produces daily** = The golden eggs

You don't just buy the coin and hope it goes up. You **own the source** of the rewards.

Miners are producing 30–100 coins per day (depending on network size). If the coin hits \$5... \$10... or \$30 like Bobby believes it can — the numbers get insane.

This is **passive income with upside**.

-

THE VISION FOR TEXTIT COIN

This is bigger than price predictions.

Bobby Gray and the Texit Coin team want to:

1. **Build a 100 megawatt mining operation** across 35 Texas-based sites
2. **Get 1 million people mining** Texit Coin
3. **Push Texit Coin into the top 100 (and eventually top 10) coins globally**
4. **Create a usable currency** accepted at real businesses (especially in Texas)
5. **Fund freedom** — the larger vision is tied to the Texas secession ("Texit") movement and economic independence

This isn't just a blockchain project. It's a **freedom project**.

THE REFERRAL OPPORTUNITY

Want to grow faster?

Textit Coin has a built-in referral system:

- Refer 3 people, get a free mining license
- Refer others and earn weekly commissions (up to \$3,000/week)
- Track your team in a full back office

You don't have to refer. You can simply mine.

But if you do refer? It can turn your node income into a serious business.

WHAT IF THIS IS YOUR SECOND CHANCE?

If you missed:

- Bitcoin at \$6
- Ethereum under \$100
- Litecoin under \$10

...Textit Coin might be your chance to get it right.

It's still early. The coin is still cheap. And the infrastructure is real.

A miner could potentially produce thousands of tokens in 18 months.

HOW TO GET STARTED

Step 1: Go to BuyTextit.com to learn more

Step 2: Choose how many node licenses you want

Step 3: Start mining and watching your wallet grow

Step 4 (Optional): Share with others and earn even more

You don't need to know everything to get started — you just need to take the first step.

FINAL THOUGHTS

Crypto is no longer optional. The future is digital.

But not all crypto is created equal. Textit Coin combines **tech, timing, transparency, and a real mission** — with the power to reward you daily for being early.

If you want in, the door's open.

If you wait, you'll probably see it later and say,

"Damn... I should've grabbed a node back when it was still early."

Make your move.
